## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 7-10 & 18-19, drawn to a cam follower that reciprocates the blades, classified in class 30, subclass 42.
  - II. Claims 11-14 & 20-22, drawn to a vacuum associated with the razor, classified in class 30, subclass 41.5.
  - III. Claims 15-17 & 23-34, drawn to a comb assembly on a razor, classified in class 30, subclass 537.

Claims 1-6 are common to Groups I-III and will be examined with any of the elected inventions.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, invention II has separate utility such as it could be used without the cam follower specifics of invention I; conversely, invention I has separate utility from invention I such as it could be used without the vacuum of invention II. See MPEP § 806.05(d)

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and

Art Unit: 3724

because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
